### Highlights of the 2018 Report

#### Number of Young Elders Holds Steady at Somewhat Lower Level

After three consecutive years of growth, the number of elders under 35 declined in 2017 and 2018. Growth among young elders has been slow but relatively steady since 2005 when the church had only 850 young elders who represented 4.69 percent of active elders. In 2018, there are 949 young elders that comprise 6.94 percent of the pool of active elders. Despite the decline by 54 young elders in the past two years, their relative percentage actually grew slightly because of the continuing decline in the total number of elders.

#### Decline in Young Women Elders Continues for Third Year

Virtually all the increase in young elders since 2005 has come from clergywomen. Women as a percentage of young elders during this period went from 31 percent to a high of 41 percent in 2015. This year marks the third consecutive year in which both the numbers of under-35 female elders and their percentage of all young elders have declined. These charts show the trends.

#### Middle Age and Older Elders Mirror Recent Trends

The makeup of middle age elders (ages 35 to 54) and older elders (ages 55 to 72) remained proportionately about the same as last year even as their numbers declined. This middle age group is 37 percent of all active elders, a record low, and down from 65 percent in 2000. Elders between ages 55 and 72 comprise 56 percent of elders in 2017, a record high, and up from 30 percent as recently as 2000.

#### Fewer Elders and More Local Pastors

Elders and local pastors are appointed as pastors of congregations. Since at least the 1980s there has been a major decline in the number of active elders while the number of local pastors increased dramatically. This pattern continues in 2018. There are 483 fewer elders and 26 more local pastors in 2018 than in 2017. The result is that since 1990 there are 7,838 fewer elders and 3,602 more local pastors. In 1990, there were over five elders for each local pastor; today there are fewer than two elders for each local pastor. In 2018, there are 13,669 elders and 7,538 local pastors.

#### Age of Retirement Declines Slightly

Since 2000 there has been a fairly consistent increase in the age at which clergy retire. The average does not increase every year, but the trend is markedly upward. The average age at which United Methodist clergy retired in 2000 was just under 64. In 2016 the average retirement age had increased to just over 66.6. However, the average retirement age across all clergy categories in 2017, the last full year of data, declined to 66.2. The retirement ages for different types of clergy are similar but not the same. For example, in 2017 the retirement ages were: elders—66, deacons—67, full time local pastors—67, and part time local pastors—69.

## Purpose and Description

The purpose of this ongoing research effort is to identify clergy age trends in the United Methodist Church so that denominational leaders have the data for planning and a baseline for monitoring future changes. This report builds on previous reports on clergy age trends issued by the Lewis Center for Church Leadership. The first report, *Clergy Age Trends in the United Methodist Church: 1985-2005*, documented the dramatic decline in United Methodist young clergy in both numbers and percentages over 20 years. This report presents a snapshot of where clergy age trends stand in May 2018.

This report is made possible through partnership with the denominational pension agency, Wespeth Benefits (WB). The Lewis Center for Church Leadership works with WB each year to determine age trends for United Methodist clergy.

The project covers elders, deacons, and local pastors in the five jurisdictional conferences of the United Methodist Church in the United States. While not all clergy are in the denominational pension system, most are, and the percentage not in the system tends to stay the same across the years, thus making trend comparisons possible. Readers should keep in mind that the total number of deacons is significantly lower in this report than their presence in the denomination because more deacons than other clergy work in employment settings with pension plans other than through WB. For local pastors, both full-time and part-time local pastors are included. Since WB does not keep records of clergy by race, we are not able to make comparisons by racial groups.

To help the church address the dramatic loss of young clergy first reported in 2005, the Lewis Center for Church Leadership has provided resources beginning with *The Crisis of Younger Clergy* by Lovett H. Weems, Jr., and Ann A. Michel (Abingdon, 2008) and the formation of cohorts of young clergy to provide advanced leader development.

More recently, the Lewis Center developed a series of free one-page downloadable documents to assist those seeking to support younger clergy.

## Contributors

Lovett H. Weems, Jr., senior consultant of the Lewis Center for Church Leadership, was project director. F. Douglas Powe, Jr., director of the Lewis Center; Ann A. Michel, associate director; Matthew Lyons, marketing manager; and Reina Villanueva, media specialist; contributed to the project. Barbara Boigegrain, general secretary of Wespeth Benefits and Investments, and the staff, particularly Amit Dharna, Taylor Curran and Tanya Lerner, provided essential cooperation and data. Thanks go also to the General Council on Finance and Administration for sharing data they collect.

### Young Clergy Trends

#### Young Elders

- The number of under-35 elders decreased by just one after a substantial decline last year. The numbers for the three most recent years are: 2016 – 1,003, 2017 – 950, and 2018 – 949.
- The percentage of young elders increased (6.94 percent compared to 6.71 percent in 2017) since the total pool of active elders continued to decline.
- The Arkansas Conference reported the highest percentage of young elders at 10.91 percent.
- The Top Ten Conferences by percentage
  - Arkansas (also #1 in 2017, 2008 and 2007)
  - Dakotas
  - Kentucky
  - North Alabama
  - Louisiana
  - North Carolina
  - North Texas (new since last report)
  - Virginia
  - Texas (#1 in 2016, 2015, 2014 and 2012)
  - Tennessee (new since last report)
- As in previous years, most of the conferences with larger percentages of young clergy are from the Southeastern and South Central Jurisdictions. Dakotas from the North Central Jurisdiction appears in the Top Ten again this year with the second highest percentage at 10.71. Since these reports began in 2005, the North Central and Western Jurisdictions have had two conferences each in the Top Ten, and the Northeastern Jurisdiction has had one conference in the Top Ten lists.
- The largest total number of young elders (56) is in the Virginia Conference, followed by Western North Carolina (54).

#### Young Deacons

- The number of under-35 deacons remained the same in 2018 at 124. This is a record high number of young deacons.
- The percentage of young deacons among all active deacons increased slightly from 12.30 percent in 2017 to 12.41 percent in 2018, also a record high.
- While the number of young deacons is still small compared to young elders, their percentage of all deacons has run consistently higher than that of young elders since 2008.

#### Young Local Pastors

- The number of under-35 local pastors increased from 595 in 2017 to 626 in 2018.
- The percentage of young local pastors among all active local pastors stayed approximately the same, around 8 percent, in 2018.

#### Comparison to U.S. Population Ages 25-72

- Of this age range, 24 percent are 25-34 (clergy percentages: elders-7; deacons-12, local pastors-8)
- Of this age range, 42 percent are 35-54 (clergy percentages: elders-37; deacons-40, local pastors-34)
- Of this age range, 34 percent are 55-72 (clergy percentages: elders-56; deacons-48, local pastors-58)

## Elders

To have comparable figures across the years for elders, the figures include *not only those ordained elder but also those commissioned on the elder track but not yet ordained.*

## Deacons

Deacon numbers include *not only those who have been ordained deacon but also those who have been commissioned* on the deacon track but not yet ordained. Readers should keep in mind that the total number of deacons is significantly lower in this report than their presence in the denomination because more deacons than other clergy work in employment settings with pension plans other than through the WB.

### About the Lewis Center for Church Leadership

Established by Wesley Theological Seminary in 2003, the Lewis Center for Church Leadership helps the United Methodist Church address its current challenges. The Center is building a vision for church leadership grounded in faith, informed by knowledge, and exercised in effective action. It seeks a holistic understanding of Christian leadership that brings together theology and management, scholarship and practice, research and application.

Committed to the broad goal of helping the church reach more people, younger people, and more diverse people, the Center focuses on improving leadership effectiveness and providing actionable insights and best practices to promote effective ministry. The Center seeks to be a trusted resource for church leaders so that congregations increase in service, vitality, and growth. The Center staff of six, along with other researchers and consultants who assist with special projects, also draws on the expertise of the entire Wesley Seminary faculty and a wide array of gifted practitioners.
